## **DETAILED ACTION**

### ***Drawings***

The corrected Drawings filed 13 April 2006 are accepted by the examiner.

### ***Specification***

The corrected Specification and Abstract filed 13 April 2006 are accepted by the examiner.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kiomars Anvari on 18 July 2006.

The application has been amended as follows:

As to claim 1:

Line 5; -- and any other none wireless applications, -- is deleted and a comma is inserted to read -- communication systems, the Crest Factor -- .

Line 9, after "input signal to" and before "amplifier," -- an -- is inserted.

Line 11, a first and second, -- envelop -- is deleted and --envelope -- is inserted.

Line 25, -- pre-distort -- is deleted and -- pre-distorts -- is inserted.

Line 27, -- prepare -- is deleted and -- prepares -- is inserted.

Line 28, after "delivery to" and before " multi-carrier", -- an -- is inserted.

Line 29, after "adaptively updates ", -- the -- is deleted and -- an -- is inserted.

Line 31, after "the inputs to" -- the -- is deleted and -- an -- is inserted.

Line 31, -- adjust -- is deleted and -- adjusts -- is inserted.

This examiner's amendment was requested to correct two conditions for a lack of antecedent basis, minor spelling and syntax errors and the deletion of contradictory language in the preamble in claim 1.

#### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art made of record does not teach a wireless Crest Factor reduction and amplitude pre-distortion circuit for use with multi-carrier signals in a wireless communication system comprising a digital signal processing function that converts the amplitude clipped or limited multi-carrier baseband to baseband representative of individual carrier signals, a digital signal processing function that filters the baseband representative of individual carrier baseband signals to remove unwanted signal produced due to clipping or limiting the multi-carrier signal amplitude and a digital signal processing function that up converts the filtered baseband representative of each carrier to its original baseband frequency.

***Conclusion***

The prior art made of record and not relied upon but considered pertinent to applicant's disclosure includes: Cleveland et al. (US 2006/0140296), Laaser (US 2005/0069045) and Leung (US 2004/0234006).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
